JANOME MC500E

Asking \$2,500

The Janome 500e is a computerized embroidery machine for fabric embroidery, up to 280 mm x 200mm. The machine performs embroidery speeds of up to 860 stitches per minute. A very convenient feature in the machine is the automatic threader and thread cutter. The large, clear backlit LCD touch screen, and menu in English or other global languages make operation of the machine very clear and understandable. Everything about the 500e is designed around being user friendly. Built in Needle Threader.

AcuFil Quilting Kit

The AcuFil kit allows you to perfectly stipple your quilts or quilting projects. Let the machine and software do all the work for you. Only used once in a class.

The machine has been well taken care of and has recently been serviced in preparation for its new home.
