

SUPPLY LIST FOR CLASS, DEMO, OR CLUB

Snip & Stitch

**Needle Knowledge Lecture/Demo
with Julie**

We use our sewing machines for many different techniques and to sew a wide variety of fabrics. One of the simplest and most important things that we can do to help our machines sew well is to use the correct needle for the job we are asking it to do. In this lecture/demo you will learn about the different types and sizes of needles available to the modern home sewer so that you can choose your needles with confidence.

Your curiosity, a notebook and a pen.
